

A 3D perspective diagram of a door set within a frame. The door is slightly ajar, revealing a grid pattern on the floor. A handle is mounted on the door, and a lock mechanism is visible on the edge of the door frame.

This exploded view diagram illustrates the components of a double door assembly. The parts are numbered as follows:

- 1:** Small rectangular components, likely door pulls or handles, shown at the top left and bottom left.
- 2:** A long, thin vertical component, possibly a hinge or edge trim, located on the left side.
- 3:** A long, thin horizontal component, likely a threshold or bottom edge trim, located at the bottom right.
- 4:** A small rectangular component, possibly a hinge or latch part, located at the top right.
- 5:** A long, thin horizontal component, possibly a hinge or latch part, located at the bottom right.
- 6:** A small rectangular component, possibly a hinge or latch part, located at the top right.
- 7:** A small rectangular component, possibly a hinge or latch part, located at the bottom right.
- 8:** A long, thin vertical component, possibly a hinge or edge trim, located on the left side.
- 9:** A small rectangular component, possibly a hinge or latch part, located at the top right.
- 10:** A dashed rectangular area on the right door panel, indicating a location for a component.
- 11:** A long, thin horizontal component, possibly a hinge or latch part, located at the top right.
- 12:** A dashed rectangular area containing three small components, possibly hinges or latches, located at the top right.
- 13:** The right door panel, shown with a dashed rectangular area indicating a location for a component.
- 14:** The left door panel, shown with a dashed rectangular area indicating a location for a component.
- 98:** A small rectangular component, possibly a hinge or latch part, located at the bottom left.
