

This exploded view diagram illustrates the assembly of a door system. The components are numbered 1 through 16, with additional parts 17 and 18 shown in separate boxes at the top. The diagram includes two door panels, 19 and 20, which are the central elements. Surrounding them are various trim pieces, including vertical profiles (1, 2, 5, 7, 12, 13), horizontal profiles (6, 8), and a top cap (4). Hardware components like screws (3), bolts (10), and a handle (11) are also shown. A 'Ident' label with an arrow points to the vertical profile 2. The top section shows two long horizontal bars, 17 (1200 mm) and 18 (1800 mm), which are likely for the top of the door or a related structure. The bottom left shows a small component 96, possibly a hinge or latch part. The diagram is a technical illustration for assembly instructions, showing the relative positions and orientations of all parts.
