

[illegible]

This exploded view diagram illustrates the assembly of a two-door refrigerator. The components are numbered as follows:

- 17**: 1200 mm top rail
- 18**: 1800 mm top rail
- 1**: Vertical side panels
- 2**: Vertical side panels (left door)
- 3**: Small components (screws, spacers, etc.)
- 4**: Top hinge cap
- 5**: Top hinge
- 6**: Bottom hinge
- 7**: Vertical side panels (right door)
- 8**: Bottom rail
- 9**: Small components (screws, spacers, etc.)
- 10**: Small components (screws, spacers, etc.)
- 11**: Door handle
- 12**: Vertical side panels (left door)
- 13**: Vertical side panels (right door)
- 14**: Vertical side panels (right door)
- 15**: Small components (screws, spacers, etc.)
- 16**: Bottom rail
- 19**: Left door panel
- 20**: Right door panel
- 98**: Small components (screws, spacers, etc.)

The diagram shows the assembly sequence for the top and bottom rails, side panels, hinges, handles, and door panels. The left door panel (19) and right door panel (20) are shown in the center, with the side panels (1, 2, 7, 12, 13, 14) and hinges (5, 6) being attached to them. The top rail (17, 18) and bottom rail (8, 16) are shown at the top and bottom respectively. The handles (11) are shown being attached to the side panels. The small components (3, 9, 10, 15) are shown in dashed boxes, indicating they are used for various parts of the assembly.
