

EN Bathroom Cabinet Installation

- For a correct installation, first of all the evenness of the wall on which the installation will be made and the suitability of the wall dimensions with the cabinet should be checked. Take the cabinet out of the packing smoothly, and place the product packing beneath the product in order to prevent any damages.
- Start the installation from the top cabinet first because the lower cabinet may suffer damage during installing the top cabinet.

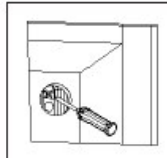

Upper Cabinet Suspension Distance = 1900-X

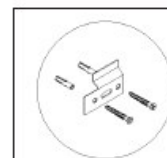

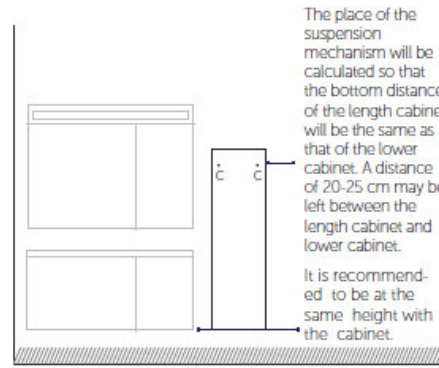

Ensuring that the top distance of the cabinet is 190-x cm from the floor, the place of the suspension mechanism corresponding to the wall will be calculated. The (a) value may vary depending on the cabinet dimensions.

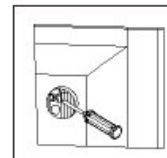

The wall is drilled with the help of a drill and the anchor is hammered into the hole. The pieces of the suspension mechanism are fixed to the wall with screws. The upper cabinet is hung so as to correspond to the suspension mechanism.

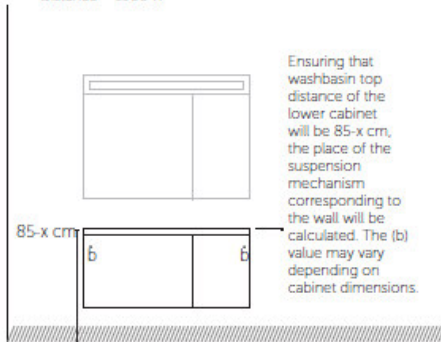

Through the suspension mechanism adjustments, the cabinet level is suitably adjusted and screwed.

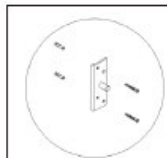

The wall is drilled with the help of a drill and the anchor is hammered into the hole. The pieces of the suspension mechanism are fixed to the wall with screws. The length cabinet is hung so as to correspond to the suspension mechanism.

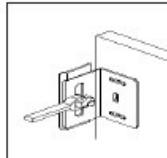

Through the suspension mechanism adjustments, the cabinet level is suitably adjusted and screwed.

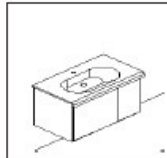

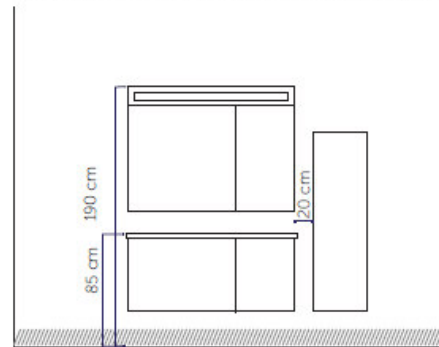

Ensuring that washbasin top distance of the lower cabinet will be 85-x cm, the place of the suspension mechanism corresponding to the wall will be calculated. The (b) value may vary depending on cabinet dimensions.

The wall is drilled with the help of a drill and the anchor is hammered into the hole. The pieces of the suspension mechanism are fixed to the wall with screws. The lower cabinet is hung so as to correspond to the suspension mechanism.

Through the suspension mechanism adjustments, the cabinet level is suitably adjusted and screwed.

The washbasin is placed on the cabinet correctly and fixed by applying silicone.
